

# ZOOM

into the future on June 12!  
with **Kevin Honeycutt**  
Global Speaker and thought  
leader on educational innovation

**3** hours to change the way you  
teach in a rapidly changing  
world. Join us for a **mini-  
conference like no other!**

Learn how you can easily design and make your own APPS. And yes it is pretty darn easy, I promise you can do this....your students can too. It is a great way to reach more kids and maybe even their parents.

## Themes will include:

- ➔ **Designing Virtual Hands-On**
- ➔ **Creative Ways Reach & Teach Kids At Home**
- ➔ **Building & Maintaining Relationships Over Distance**
- ➔ **Building Tools & Resources That Will Continue To Empower Learning Even After All Of This Is Over**

# 3-Hour Zoom

**Whether you're dressed nice or wearing pajama pants, if you're hungry to learn new and innovative ways to reach and teach we've got you covered!**

**60 Minutes:** An inspirational keynote packed with ideas and resources to extend your reach and empower your ability to motivate learners and learning, ending with a hands-on learning challenge you'll work on during the breakout session.

**45 Minutes:** Hands-on breakout session where you'll build something with your virtual colleagues whether with found materials from your house or online resources. Afterward you'll share your creations with the group.

**15 Minutes:** We'll Review and debrief and let you share your ideas and insights about the combination of virtual and hands on learning.

**30 Minutes:** Kevin will share even more ideas and resources for supporting learners both online and in the room.

**15 Minutes:** We'll send you on Learning Safari where you'll have time to explore the many resources, websites and curated collections of materials we've share with you.

**15 Minutes:** Wrap up and learning challenge.

- Registration Link: <http://coe.k-state.edu/events/ipad-camp.html>
- Cost: \$50
- When: June 12th beginning at 9:00am-Noon
- Zoom link will be sent via email with instructions
- Guess what? Any device will do, iPad, Mac, Chromebook, Laptop, PC, and even your phone.
- Questions, contact Cyndi at [cyndidk@ksu.edu](mailto:cyndidk@ksu.edu)

Growing imaginations

# Supply List

You'll build a Martian colony during your breakout session. The supplies you'll need are on this page. However, you can also build your colony using **online tools**, especially those that will allow you to **collaborate** with your peers in the breakout session!

I know you are thinking how is this possible, but would we have ever thought that we would all be teaching online in K-12 with less than a weeks notice in 2020. Kevin will give you ideas and show you first hand how to do this all remotely. Is it a challenge, sure, but can you do it, learn, have fun and engage your students, **ABSOLUTELY**.

**GOOD NEWS:** Any device will do, iPad, Mac, Chromebook, Laptop, PC, and even your phone.
